

Zero Zero no emission, no costs

Ladeinfrastruktur-Konferenz 2025, 20. November 2025

BEVs are the biggest unutilized flexibility

10 million EVs offer over
100 GW power and 600 GWh
decentralize capacity

Germany's pumped hydro's
offer only 7 GW and 40 GWh

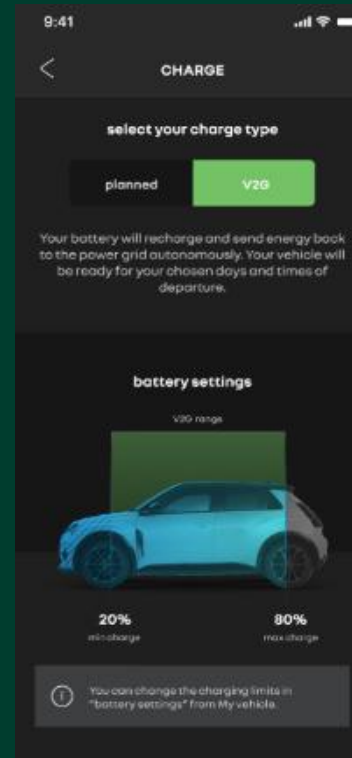

Zero Emissions and Zero Costs since November 2024 in France with Renault & The Mobility House Energy

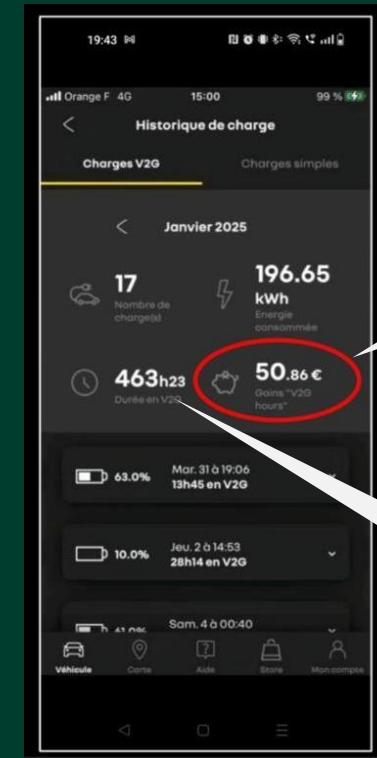

Renault 5 E-TECH
with integrated
bidirectional AC
charging

Bidirectional
AC charging
station
PowerBox Verso

MyRenault
App for V2G
control

11ct/h
refund from
V2G trading
(~10,000km
for free)

Plugged
62% of
the month
15h/day

Flat energy tariff
and refund for
plug in time to
customer and
Mobilize/Renault

7 bridges have to be crossed to reach the V2G heaven

V2G Eco System and Tech Stack
